

Press Release

OHSAS 18001:2007 Certification Achievement For EPS

EPS are delighted to announce that following a strenuous and vigorous audit process the Company has attained certification for its Health & Safety Management System.

Due to the continued commitment and effort by all involved the latest health and safety milestone has been achieved.

OHSAS 18001:2007 is an internationally recognised occupational health and safety management system standard and is intended to address occupational health and safety rather than product safety.

OSHAS 18001:2007 provides a certified framework for the effective management of occupational health & safety including compliance with all legislation that applies to the Company activities and identified hazards.

The certification process has been provided by NQA.

This most recent achievement is another stage in the process for EPS in our overall management system development for Quality, Environment and Health & Safety and the Group has now got an audited and certified system in place for all areas as well as the SAFE-T-Cert from the CIF.
